

July 10, 2010

Dear Parents & Staff,

Asbestos removal at the Kansas School for the Deaf has been addressed since the Asbestos Hazard Emergency Response Act of 1986 (AHERA). Asbestos has been removed from all areas frequented by students and staff. We will continue to remove asbestos in isolated locations to meet the regulations of AHERA. As in the past, the removal will be accomplished during times and in a manner which results in no risk to students or staff.

We will continue to manage Asbestos according to AHERA requirements, maintaining a healthy and safe environment for our students and employees. Please don't hesitate to contact me with any questions or concerns.

Yours truly,

Madeleine Burkindine
Superintendent
